

PRATIBHA KAMBLE

Data Analyst | Power BI Analyst | Business Intelligence Analyst

Sangli, Maharashtra, India • +91-8390932596 • kamblepratibha7171@gmail.com

[LinkedIn](#) • [GitHub Portfolio](#)

PROFESSIONAL SUMMARY

Microsoft Certified Power BI Data Analyst (PL-300) with hands-on expertise in Power BI, SQL, Python, and Advanced Excel. Proven ability to design interactive dashboards, build end-to-end ETL pipelines, and translate complex datasets into actionable business insights. Experienced in data modeling, DAX calculations, KPI reporting, and delivering data-driven solutions for measurable business impact. Seeking an entry-to-associate-level Data Analyst / BI Analyst role to contribute analytical skills in a fast-paced, data-driven organization.

CORE COMPETENCIES

Power BI & DAX	SQL & MySQL	Python (Pandas)	Advanced Excel
Data Modeling	Power Query / ETL	Dashboard Development	KPI Reporting
Data Visualization	Business Intelligence	EDA & Data Cleaning	Data Storytelling

TECHNICAL SKILLS

BI & Visualization	Power BI (Desktop & Service), DAX, Power Query, Dashboard Design, KPI Development, Data Storytelling
Data Analysis	SQL (Joins, Subqueries, Window Functions, Aggregations), Python (Pandas, NumPy, Seaborn, Matplotlib), Advanced Excel (Pivot Tables, VLOOKUP, Slicers, Charts)
Data Engineering	ETL Pipelines, Data Cleaning, Data Transformation, Feature Engineering, Relational Database Design (3NF)
Databases	MySQL, MongoDB
Machine Learning	Scikit-learn (Classification, Logistic Regression), Model Evaluation (ROC-AUC, Accuracy)
AI & Productivity	Generative AI, ChatGPT, Prompt Engineering

CERTIFICATIONS

- Microsoft Certified: Power BI Data Analyst Associate (PL-300) | *Microsoft*
- Certified Data Analytics with Python — AICPE
- Data Analysis with Python — freeCodeCamp

PROJECTS

Financial Fraud Detection Dashboard — *Python | SQL | Power BI | Machine Learning*

- Analyzed 100K+ financial transactions using Python (Pandas) and SQL to detect fraudulent patterns, performing end-to-end data cleaning, EDA, and feature engineering.
- Built a fraud detection ML model achieving 97% accuracy and ROC-AUC of 0.96, identifying high-risk transactions based on timing, customer behavior, and product risk indicators.
- Designed Power BI dashboard to visualize fraud trends, transaction anomalies, and key business insights enabling proactive risk mitigation.

- Delivered SQL-based KPI reports supporting business performance tracking and compliance decision-making.

Meta Ads Performance Analytics Dashboard — *Power BI | DAX | Data Modeling*

- Developed an interactive Power BI dashboard analyzing 335K+ impressions and 39K+ clicks from Meta advertising campaigns, enabling data-driven marketing optimization.
- Engineered DAX measures for CTR, Conversion Rate, Engagement Rate, and Purchase Rate, creating a unified KPI reporting framework for campaign performance tracking.
- Built demographic analysis segmented by Gender, Age, and Country, identifying high-performing audience segments that improved ad spend ROI.
- Implemented dynamic slicers for campaign-level and audience-level drill-through analysis, reducing manual reporting time by enabling self-serve BI for stakeholders.

Data Cleaning & Exploratory Data Analysis Pipeline — *Python | Pandas | Seaborn | Matplotlib*

- Engineered a scalable, reusable ETL/data cleaning pipeline using Pandas to handle missing values, duplicates, and outliers across large datasets, improving data quality and reliability.
- Performed feature engineering (AgeGroup, IncomeGroup) and standardized data types, preparing clean, analysis-ready datasets for downstream BI and ML workflows.
- Conducted EDA using Seaborn and Matplotlib, uncovering customer behavior patterns and statistical correlations to support business decision-making.

Blinkit Sales Dashboard — *Advanced Excel | Pivot Tables | Data Analysis*

- Built an interactive Excel dashboard analyzing \$1.2M+ in sales data using pivot tables, dynamic charts, and slicers to reveal top-performing product categories and outlet trends.
- Converted raw transactional data into actionable business insights on customer purchasing patterns, directly supporting inventory and sales strategy decisions.

Relational Database Design & SQL Analysis — *SQL | MySQL | Database Design*

- Designed a normalized relational database schema following 3NF principles, ensuring data integrity and eliminating redundancy for scalable data management.
- Implemented complex SQL queries including multi-table JOINS, correlated subqueries, aggregations, and window functions to generate KPI-based business reports.
- Optimized query performance on large datasets using indexing and query restructuring, improving report generation efficiency.

EDUCATION

Bachelor of Science (B.Sc)

Smt. Kasturbai Walchand College

Sangli, Maharashtra

ADDITIONAL INFORMATION

Languages: English (Professional), Hindi (Fluent), Marathi (Native)

Availability: Immediately available for entry-level to associate-level Data Analyst / BI Analyst roles

Open To: Full-time | On-site | Hybrid | Remote
